## Calendar

**May 1** CLO Lunchtime Seminar, noon - 1pm  
Speaker: Dr. Christine Sheppard  
*The Science Behind Bird Collisions and Bird-Friendly Recommendations*

**May 1** CLO Monday Night Seminar, 7:30pm

## Cayuga Bird Club Meeting, May 8

***From PA to Africa:  
Chickadees in Forest  
Fragments & House  
Sparrows in Africa***

**Speaker: Dan Ardia,  
PhD, Associate  
Professor, Franklin  
and Marshall College,  
Lancaster, PA; Department of Biology**

Dan Ardia will discuss two projects likely to change how you watch local birds. The first looks at movement and survival of Carolina Chickadees in forest fragments in central Pennsylvania. The second project studies how invasive House Sparrows spread across Africa. Two field expeditions (Kenya and Senegal) reveal interesting differences in which birds are at the leading edge of the expansion and how they differ in behavior. Expect interesting pictures and videos and new perspectives on two common birds.

Dan Ardia is an Associate Professor of Biology at Franklin & Marshall College, where he conducts research on how birds and mammals respond to a changing environment. A native of Central New York, Dan grew up in Skaneateles, NY before attending Tufts University, followed by SUNY-ESF and Cornell for graduate school. A former Peace Corps volunteer, Dan has a passion for international research, having worked in Costa Rica, Australia, New Zealand, Brazil, Argentina, Belize, Kenya, and Senegal.

The meeting will be held at the Cornell Laboratory of Ornithology. Doors open at 7:00 pm and there will be cookies and conversation starting at 7:15. Bird club

Speaker: Dr. Christine Sheppard  
*Bird Mortality From Collisions With Glass: What we've learned, what we need to know, what you can do*

**May 8** Cayuga Bird Club Meeting and Seminar, 7:30pm

Speaker: Dr. Dan Ardia  
*From PA to Africa: Chickadees in forest fragments & house sparrows in Africa*

**May 9** *Wild in Stewart Park: Sights and Sounds from the Park We Love*

Fundraiser for Stewart Park, 7:30pm  
Cinemapolis

**May 13** Field Trip to Danby and Thatcher's Pinnacles, 7am - noon

Leader: Wes Blauvelt  
Meet at Jennings Pond, Danby

**May 13** Stewart Park Bird Walk, 9am - 10:30am  
Meet near Stewart Park boathouse

**May 13** eBird Global Big Day

**May 14** Field Trip to Hawthorn Orchard, 8am - 11am

Leader: Ken Kemphues  
Meet at Oxley Equestrian Center dirt parking lot (west side)

**May 27** Stewart Park Bird Walk, 9am - 10:30am  
Leader: Jody Enck  
Meet near Stewart Park boathouse

**May 27-29** Spring Bird Quest

Fundraiser for Fingerlakes Land Trust

Leader: Mark Chao

May 27 8am - 11am: Lindsay-Parsons Biodiversity Preserve

May 28 8am - 9:30am: Bock-Harvey Forest Preserve

May 28 10am - 11:30am: Stevenson Forest Preserve

May 29 6:30am - 8am: Goetchius Wetland Preserve,

May 29 8:30am - 10am: Roy H. Park Preserve.

See <http://flit.org/events/> for directions and detailed information.

**June 3** Field Trip to Shindagin Hollow, 7am - noon  
Leader: Laura Stenzler  
Meet at Cornell Lab of O. parking lot

**June 4** Field Trip to Connecticut Hill, 7:30 am - noon

Leaders: Suan Yong and Dave Gislason

Meet at 7:30 am at the Wegman's parking lot or at 8:00 am at the intersection of Connecticut Hill Rd., Boylan Rd., and Lloyd Starks Rd.

business begins at 7:30 pm followed by the presentation. All are welcome.

---

## **From the President**

*Jody Enck*

Hello Cayuga Birders,

Spring migration is in full swing, and I hope you are getting outside and seeing some wonderful birds! You never know what you'll see when you look to the skies. The other day while

collecting data for the SWAMP study (Sapsucker Woods Acoustic Monitoring Project

[<http://ebird.org/content/ebird/avicaching/swamp/more>]), I looked up and observed an American White Pelican flying over! Two pelicans already are known to be hanging out up at Montezuma National Wildlife Refuge so this amazing sight was not completely in the extraordinary category. Still, it was a cool bird to see.

Because I was collecting data for the SWAMP study, this sighting made it eventually into eBird, and folks who have a "county needs" alert set up for eBird eventually go word of the sighting. That night, a friend of mine sent me a nice email saying that such a rare bird deserved to be reported in real time so that others might have had a chance to look up and see it too. Fair enough! But, there is just one small hitch in that plan – I don't own a smart phone.

When I am in the field birding or collecting data, I take notes and draw pictures in a little rite-in-the-rain notebook. Eventually, I go home and enter all that information into eBird using my laptop computer. The day I saw the American White Pelican, I did not take the time to go home and send out a message. Plus, my little trac-fone does not save phone numbers, and I could not remember the number, so I could not send an alert out to the phone RBA [Rare Bird Alert]. I did find a birding friend later in the morning who sent a message out to the phone RBA using his phone, but by then the bird was long gone.

**June 12** Annual Cayuga Bird Club Dish-to-Pass Picnic, 6:30pm  
Myers Park, Pavilion A, Lansing  
See our [Web Calendar](#) for more events and field trips.

---

## **First-of-Year Birds Reported during April for the Cayuga Lake Basin**

Listed below are Cayuga Lake Basin first arrivals reported last month.

Mar. 31 American Bittern  
Apr. 1 Caspian Tern  
Apr. 1 Northern Rough-winged Swallow  
Apr. 1 Cliff Swallow  
Apr. 2 Northern Goshawk  
Apr. 2 Chipping Sparrow  
Apr. 3 Ruby-crowned Kinglet  
Apr. 4 Spotted Sandpiper  
Apr. 4 Purple Martin  
Apr. 4 Pine Warbler  
Apr. 7 Red-throated Loon  
Apr. 7 Bank Swallow  
Apr. 7 Brown Thrasher  
Apr. 8 Common Gallinule  
Apr. 8 Louisiana Waterthrush  
Apr. 9 Green Heron  
Apr. 10 Broad-winged Hawk  
Apr. 10 Common Tern  
Apr. 10 Blue-headed Vireo  
Apr. 10 Blue-gray Gnatcatcher  
Apr. 11 Long-eared Owl  
Apr. 11 Palm Warbler  
Apr. 12 Virginia Rail  
Apr. 15 Sora  
Apr. 17 American White Pelican  
Apr. 18 Dunlin  
Apr. 18 Pectoral Sandpiper  
Apr. 18 Little Gull  
Apr. 19 Upland Sandpiper  
Apr. 19 Chimney Swift  
Apr. 20 Black-necked Stilt  
Apr. 20 Black Tern  
Apr. 20 Northern Parula  
Apr. 21 Cattle Egret  
Apr. 21 Black-throated Green Warbler  
Apr. 22 American Golden-Plover  
Apr. 22 Nashville Warbler  
Apr. 22 Yellow Warbler  
Apr. 24 Black-crowned Night-Heron

My friend who emailed me was very nice and reminded me of the sharing ethic that exists among birders. Having said that, it also made me think very deeply about just what that sharing ethic entails, and whether it really is the same for all birders. I am thrilled to share my modest knowledge of birds and bird ecology with others. I am more than happy to share that sense of discovery when a couple of birders stumble upon rare and exciting, like an American White Pelican for example. This is especially true if we have the opportunity to study the bird together to learn something new about it.

But, what I personally am less inclined to want to share is information about a bird just so somebody else can add it to their list. For some birders, keeping lists as a friendly competition with other birders is important. And that is a fine thing for them, but it is not for me. I will do my best to let others know through timely communication when I've seen something rare or unusual. Just please don't expect me to go out of my way to share bird sightings to help others check off more species on a list. For me, sharing involves passing along helpful hints about bird ID or ecology, providing scientific data for others to use in some way, or sharing in a sense of discovery. I am sure there are plenty of other ways that birders manifest an ethic of sharing. What does that mean to you?

Good birding!

---

## **Dryden Lake Field Trip Report, April 8**

*Ann Mitchell*

Eight people dared to join me on a blustery, cold day for a trip to Dryden Lake and George Road. When we arrived at Dryden Lake, we immediately heard and saw two Wood Ducks flying around. They flew around off and on during most of our time there. On the lake we saw Gadwall, both Green-winged and Blue-winged Teal, a Ring-necked Duck, Mallards, Common Mergansers, and Double-crested Cormorants. We also saw a Great Blue Heron, a Bald Eagle, Osprey, Red-tailed Hawk, a Northern Harrier, and Turkey Vultures. A

Apr. 24 Solitary Sandpiper  
Apr. 24 Black-and-white Warbler  
Apr. 24 Orchard Oriole  
Apr. 24 Baltimore Oriole  
Apr. 25 Warbling Vireo  
Apr. 25 Northern Waterthrush  
Apr. 26 Black-bellied Plover  
Apr. 26 Common Yellowthroat  
Apr. 27 Eastern Kingbird  
Apr. 27 Ovenbird  
Apr. 27 Golden-winged Warbler  
Apr. 27 Lincoln's Sparrow  
Apr. 27 Rose-breasted Grosbeak  
Apr. 28 Eastern Whip-poor-will  
Apr. 28 Least Flycatcher  
Apr. 28 Great-crested Flycatcher  
Apr. 28 Red-eyed Vireo  
Apr. 28 Chestnut-sided Warbler  
Apr. 28 American Redstart  
Apr. 28 Blackburnian Warbler  
Apr. 28 Scarlet Tanager  
Apr. 29 Stilt Sandpiper  
Apr. 29 Least Sandpiper  
Apr. 29 Long-billed Dowitcher  
Apr. 29 Blue-winged Warbler  
Apr. 29 Orange-crowned Warbler  
Apr. 29 Prairie Warbler

#### **2017 total count to April 21: 208 species**

Thanks to Dave Nutter for compiling these records for the club. Details are available on the [CBC website](#).

### **April Cayuga Bird Club Meeting Minutes**

are available at the [CBC website](#).

### **Upcoming May Field Trips**

The Cayuga Bird Club has scheduled three field trips in May. These trips are open to all.

Wes Blauvelt will lead a Cayuga Bird Club field trip on **Saturday, May 13**, 2017 to several birding hotspots in the **Danby area**. This will include stops at Jennings Pond, along Bald Hill Road and a hike to Thatchers Pinnacles in search of an early arriving Worm-eating Warbler. If time permits, stops

Belted Kingfisher noisily went up and down the lake and we saw three Eastern Phoebes fly-catching on the other side of the trail.

After leaving the lake, we went to Hart Road, which is near George Road in the town of Dryden. There were two Eastern Meadowlarks that some of us had good looks at. Everyone saw the Savannah Sparrows, Song Sparrows, Horned Larks, American Kestrel, Northern Harrier, and Red-tailed Hawk. There was also a Vesper Sparrow there which only one person saw. We then headed back to our cars at the Lab of O. We all had a very good time despite the weather. Thanks to everyone who joined me.

---

### **Trip to Derby Hill, April 23**

*Gladys Birdsall*

Jae Sullivan joined me for the Cayuga Bird Club trip to Onondaga Audubon's Derby Hill Hawk watch on Sunday, April 23rd. The weather was right for a good flight and we were not disappointed. The official count position switched to the south lookout fairly early as the winds had changed from southerly to the northwest. Although it was sunny and clear, with the NW winds we still needed to dress warmly. Birds were moving through high and distant because the NW winds were moving them inland from the lake. We were treated to hundreds of Broad-winged Hawks, some to the east of the lookout, but others passed right over us. Others moved by between the south lookout and Lake Ontario. With birds being more distant, it made identification more challenging. We still had good looks at the Broad-winged Hawks, as many came right overhead. A Red-shouldered Hawk came by and we both were able to see the "commas" in the wings. A Merlin quickly moved through west of the lookout. Jae was able to see those "falcon wings". A nice pamphlet showing hawk silhouettes was passed out, which Jae found very helpful.

We also saw a Northern Harrier, Sharp-shinned Hawks, an Osprey, Turkey Vultures, and Red-tailed Hawks. During our time there five Bald Eagles migrated by with 4 of them being called: two juvenal, one immature and one sub-adult. (I could tell they were not

will also be planned along Michigan Hollow Road and the wetlands near Hillview Road. The trip will begin at 7:00 AM and conclude at noon. **Meet at Jennings Pond, Danby, at 7:00 am.**

On **Sunday, May 14**, Ken Kempfues will lead a trip through the **Hawthorn Orchard** in Ithaca, **8:00 am - 11:00 am**. When the Hawthorns are in bloom, this small area is a spectacular magnet for migrating warblers. And since the trees are not very tall, birds are more easily visible than in other places, often seen at eye-level! **Meet at the dirt parking lot at the Oxley Equestrian Center on Pine Tree Road at 8am.** We will walk to the Hawthorn Orchard from there. The trails through the Hawthorn Orchard can be wet and muddy, so waterproof boots may be helpful for this trip. Contact Ken at [kjk1@cornell.edu](mailto:kjk1@cornell.edu) if you have questions.

On **Saturday, May 20**, Gladys Birdsall will lead a half-day trip to the **Dorothy McIlroy Bird Sanctuary**, a preserve of the Finger Lakes Land Trust. The preserve is located along the outlet of Lake Como in the town of Summerhill, and has a peat swamp and hemlock forest that supports a high diversity of species more commonly found in northern forests. The preserve also protects a number of uncommon or rare plant species.

**Meet for carpooling at the Cornell Lab of Ornithology north parking area at 7:00 am.** We will return at noon. Bring a snack and something to drink.

Please check the [Cayuga Bird Club calendar](#) for updates in case there are date changes for these or any other field trips.

---

## **Bird Walks at Stewart Park**

We will continue to hold bird walks at Stewart Park on **May 13** and **May 27**, from **9am** to about 10:30am. We'll especially be looking for migrants and local breeding birds. No birding experience necessary-- just come and have fun! Meet at the west end of the park near the boathouse.

---

## **Wild in Stewart Park: Sights and Sounds from the Park We Love**

adults)! A Sandhill Crane cruised by.

Other birds seen or heard at the South Lookout were Tree Swallows, Eastern Bluebird, American Goldfinch, Purple Finch, Savannah Sparrow, and Eastern Meadowlark. A group of seven Wild Turkeys were in a distant field; the male was strutting around for the females.

From the North lookout we saw many Long-tailed Ducks out on Lake Ontario. Cormorants were flying back and forth. I had nice looks at a Pine Warbler sitting low in a tree, and we both saw a Yellow-rumped Warbler and Ruby-crowned Kinglets.

The Broad-winged Hawk count for the full day was 4,951, and the total of all hawks counted was 5,445. It is truly thrilling to take in this migration spectacle, and we were so fortunate to have a good day for it.

We drove back via Montezuma Wildlife Refuge. Stopping at the potato building on Rt. 31, we were treated to nice views of many beautiful ducks. There was a group there from Binghamton and someone spotted the Black-necked Stilt across the road from the potato building. Everyone got good looks at it through the scopes. It was getting late but we did go to the wildlife drive to see the Ruddy Ducks.

Thanks to Jae for joining me on a beautiful sunny day of birding.

---

## **Park Preserve, April 29**

*Paul Anderson*

I led a trip Saturday morning, April 29, to the Park Preserve; about 15 people took part. Although a few drops of rain fell as I was driving to the meeting point, the threatened precipitation failed to materialize, so we enjoyed our birding dry in cool mid-50s temperatures.

We started at the South entrance. Although we heard quite a few birds, this trip was remarkable in that we saw very few of them. We heard Prairie Warbler, Eastern Towhee, several Black-throated Green Warblers, a probable Chestnut-sided Warbler,

Three accomplished Ithaca photographers will show their work on the Cinemapolis big-screen on Tuesday, **May 9**, from **7 - 9 pm** at a benefit for Friends of Stewart Park. Accompanied by live string music, *Wild in Stewart Park: Sights and Sounds from the Park We Love* will celebrate the landscape and inhabitants of Ithaca's lakefront gem and the work being done to revitalize the beloved park.

This multimedia experience features the works of bird photographers **Marie Read** and **Sarah Blodgett** and landscape photographer **Dede Hatch**. Each will introduce their collections before the images light the big-screen. The display will lead attendees through stunningly captured moments against a backdrop of live string music. Accompaniment will feature Djug Django members Eric and Harry Aceto, Dave Davies, and Brian Earle; Tenzin Chopak and Nicholas Walker; and the trio of Rick Manning, Tom Hodgson, and Tim Ball.

The woven tapestries of image and sound will include the themes *Wingbeats*, *Spring Rituals*, *Babes & Chicks*, *Seeing the Light*, *Wonderful Willows*, and *The Good Life*, engaging various goals of the Friends of Stewart Park's (FSP) revitalization work.

We hope as many of you as possible can attend and donate to this important cause: revitalizing Stewart Park (which will include planting native plants for bird habitat and removal of invasive species).

Benefit tickets may be purchased online (<http://www.brownpapertickets.com/event/2882787>) or at the door, along a sliding scale (\$10 to \$100), with a suggested \$20 ticket price.

---

**[CLO May 1 Lunchtime and Evening](#)**

Ovenbird, Common Yellowthroat, Louisiana Waterthrush, Flicker, and Carolina Wren. We did get to see Hermit Thrush, Yellow-bellied Sapsucker, a possible Sharp-shinned Hawk (although it looked much too large, it had all the right characteristics otherwise.) Kathy arrived a little later and as she was catching up with us, flushed a Ruffed Grouse.

Of course, the more common usual suspects were there too: Chickadees, Goldfinch, Dark-eyed Junco, Song Sparrow, Mourning Dove, Blue Jay, Canada Goose, Crow, Grackle, and Red-winged Blackbird.

We then went to the entrance further North, where the boardwalk is. We immediately got treated to a few nice sparrows: Song, Field, Chipping, and Swamp. A Green Heron flew over; there were Tree and Barn Swallows, a Phoebe, and a couple of male Common Mergansers in one of the distant ponds. A Broad-winged Hawk and a Turkey Vulture flew over too.

Finally we used up our final half hour by going back to Sapsucker Woods so that we could see the White-crowned Sparrows in the feeder garden.

---

### **[Finger Lakes Land Trust Spring Bird Quest, May 27-29, 2017](#)**

Cayuga Bird Club member Mark Chao will once again be leading **Spring Bird Quest** walks on Finger Lakes Land Trust preserves over the Memorial Day weekend. This is Mark's twelfth Bird Quest! These walks celebrate birds and the Finger Lakes Land Trust's work to preserve their habitats across the region. Come experience the dazzling spectacle of migrant and breeding birds, learn about their behavior and ecology, and help support the Land Trust!

This year's walks will be held at five different Finger Lakes Land Trust Preserves: Lindsay-Parsons Biodiversity Preserve (May 27, 8am), Bock-Harvey Forest Preserve (May 28, 8am), Stevenson Forest Preserve (May 28, 10am), Goetchius Wetland Preserve (May 29, 6:30am), and Roy H. Park Preserve (May 29, 8:30am).

## **Seminars- Bird Collisions with Glass**

### **Lunchtime Seminar:**

**May 1, noon - 1pm**

**Where:** Cornell Lab of Ornithology, 159 Sapsucker Woods Road

**Speaker:** Dr. Christine Sheppard, Bird Collisions Campaign Manager, American Bird Conservancy

### ***The Science Behind Bird Collisions and Bird-Friendly Recommendations***

When Christine Sheppard first started working with the American Bird Conservancy in 2009 to raise awareness about bird mortality from window collisions, she quickly discovered that there was virtually no science or basis for most recommendations. A monitoring program she coordinated for the Wildlife Conservation Society Center for Global Conservation, designed to incorporate the latest bird-friendly recommendations, was the first investigation to see whether those recommendations actually worked. Many did not. Christine has been digging into the problem ever since and will share her findings from many studies that have important applications for explaining what solutions work and why.

---

### **Evening Seminar:**

**May 1, 7:30 p.m.**

**Where:** Cornell Lab of Ornithology, 159 Sapsucker Woods Road

**Speaker:** **Christine Sheppard**, Bird Collisions Campaign Manager, American Bird Conservancy

**Title:** ***Bird mortality from collisions with glass: What we've learned, what we need to know, what you can do***

You probably think that you can see glass – but long ago, you learned a concept – glass is an invisible barrier or reflective illusion – that birds never understand. As many as a billion birds die each year in the U.S., nearly half of them on home windows. In the last decade, many scientists have contributed pieces to the puzzle of how birds really

These walks are free and open to the public, but donations are welcome. For more information and directions to the preserves, see <http://www.fltt.org/events/>. You may make a donation in honor of Spring Bird Quest at [flt.org](http://flt.org).

---

## **June Field Trips**

There are two field trips scheduled for the first weekend of June, 2017.

Laura Stenzler will lead a half day trip to **Shindagin Hollow** on Saturday, **June 3, 7am - noon**. Shindagin Hollow is south of Ithaca and consists of mature and young woods, gorges and a cedar swamp. We will see and hear a large variety of warblers including Black-throated blue, Black-throated Green, Hooded, Canada and American Redstart, all of which nest there. In addition, we'll see Yellow-throated, Blue-headed and Red-eyed Vireos, Rose-breasted Grosbeak, Winter Wren and many more birds. We will mostly be driving, getting out and listening and then driving some more. Meet at the Cornell Lab of Ornithology at 7am for carpooling to Shindagin Hollow. If you have questions, email Laura at [lms9@cornell.edu](mailto:lms9@cornell.edu).

On Sunday, **June 4**, Suan Yong and Dave Gislason will lead a Cayuga Bird Club field trip to **Connecticut Hill**. Meet at **7:30 am** at the Wegman's parking lot (away from the store, by the inlet) or at **8:00 am** at the intersection of Connecticut Hill Rd., Boylan Rd., and Lloyd Starks Rd. We'll plan to finish by noon. Bring water and a snack. Insect repellent may also be helpful.

These trips are open to all. Please check the [Cayuga Bird Club calendar](#) for updates in case there are date or time changes for these or any other field trips.

---

## **Cayuga Bird Club**

***Educating and inspiring the birding community of the Cayuga Lake Basin and Central New York since 1914***

The Cayuga Bird Club meets on the second Monday of each month, September through June, beginning with refreshments at 7:15 p.m. in the Auditorium of the Cornell

see the world. This has established a basis for developing new solutions for existing glass, as well as materials and design strategies for creating new, bird-friendly buildings. Most architects, urban planners – most people – don't understand why birds are important and how big the collisions problem is. Virtually everyone has seen or heard a bird hit glass, but think of it as a rare occurrence. Dr. Christine Sheppard will discuss the tools we have to solve the problem and the big job ahead getting those solutions implemented. However, this is one conservation issue where individuals can take immediate action and see immediate results.

Admission is free to CLO seminars. This seminar will be live-streamed. [Bookmark this web page](#) to watch live seminars and sign up for alerts about upcoming presentations.

---

## Montezuma Audubon Center Wildlife Festival

May 6, 2017, 10 am - 3pm

2295 State Rt. 89, Savannah NY

Enjoy live animal shows, family entertainment, crafts, artisans, live music, delicious food, games, and much more!

---

## [eBird Global Big Day - May 13](#)

Lab of Ornithology's Johnson Center on Sapsucker Woods Road. All meetings and most field trips are free and open to the public. Membership costs \$15 annually per household, \$10 for students, payable in September. Payment may be made via Paypal at [cayugabirdclub.org](http://cayugabirdclub.org) or by mailing a check to

Cayuga Bird Club, c/o Cornell Lab of Ornithology, 159 Sapsucker Woods Road, Ithaca NY 14850.

Please include your email address (or addresses for family memberships) with your membership application to receive the club newsletter.

Members receive via email the monthly Cayuga Bird Club Newsletter, from September through June. Newsletter submissions may be sent to Diane Morton, [cbceditor1@gmail.com](mailto:cbceditor1@gmail.com). Of particular interest are articles about local bird sightings, bird behavior, birding hot spots, book reviews, and original poetry, art, and photos.
